**TREATMENT**

**Guide for  
Treatment**

# GENERAL REQUIREMENTS

PLEASE IDENTIFY:

- ✓ SPECIES
- ✓ TIMBER PRODUCT (E.G: LVL/GLU-LAM/PLY)
- ✓ TIMBER DIMENSIONS & LENGTH
- ✓ TOTAL VOLUME - LM/M<sup>3</sup>

IN PURCHASE ORDER (required)

## MIXED THICKNESS

If packs requiring treatment are comprised of mixed thickness pieces, e.g. 75mm & 35mm, they must be separated. Mixed thickness cannot be treated together as schedules/ uptakes are different.

## END SEAL

Glu-lam & LVL's - end-seal must be applied to beams prior to treatment to ensure even distribution of preservative chemicals. Fisher's can apply end-seal if requested for a small charge.

## WRAPPING

Product is despatched from Fisher's wrapped. Customers can supply product pre-wrapped and Fisher's will endeavour to re-use the wrapping. Alternatively, customers are welcome to send rolls of their branded timber wrapping for our use with their product.

# TIMBER CONDITION

Fisher's check all product as part of our quality system requirements before treatment.

CUSTOMERS ARE ALERTED TO THE FOLLOWING ISSUES WITH THEIR PRODUCT USING OUR AUTHORITY TO PROCEED/CEASE TIMBER TREATMENT FORM:

- ✓ Damaged boards
- ✓ Blue stain/Sapstain (may result in higher uptake of chemical than normal)
- ✓ Stains/marks - timber must be clean
- ✓ Kiln dried timber only (not green)
- ✓ Moisture content must be under 20%
- ✓ Decay
- ✓ Mould

## DESPATCH OF PRODUCT

Once product has been treated, customers are sent an "Authority to Release Timber" by fax or email. This form must be completed and returned to our office before the timber can be despatched.

Please note a lead time of 7-10 business days from dropping off timber to Fisher's production facilities.
