

**FISHER'S
TIMBER
TREATMENT**

**PROTECT YOUR
VALUABLE ASSETS
TO THE CORE.**
NO ROT. NO BORERS. NO TERMITES.

Leading the way in timber preservation

Fisher's is an Australian-owned family business located in Morwell, Victoria. We have over 60 years' experience working with timber. Fisher's provide custom wood treatment to manufacturers and wholesalers utilising TRU-CORE Wood For Life® by Kop-Coat, the most advanced wood treating technology in the world – capable of penetrating normally regarded hard to treat species.

Our wood treatment capabilities

H2 Red (Permethrin)

- Capable of protecting timber from borers and termites
- Inside above-ground applications
- Does not contain VOC's
- Comes with a 25 year guarantee from insect attacks

IDEAL FOR

- Framing
- Structural materials
- Bearers & bracing
- Structural materials (All sizes)
- Plywood

H3 Green (Azole with Permethrin)

- Capable of protecting timber from borers and termites
- Protects timber from rot and decay
- Outside above-ground applications
- Does not contain VOC's
- Comes with a 25 year guarantee from insect attacks and fungal decay

IDEAL FOR

- Exterior cladding
- Door frames & sills
- Engineered wood products
- Window componentry
- Decking

What is TRU-CORE®?

Tru-Core® is a chemically-based process for rapidly delivering globally accepted wood preservatives and insecticides deep into the core of wood and wood-composite substrates.

TRU-CORE
Wood for Life®

KOP-COAT
Wood Protection Products

CARRIER IN TRU-CORE® IS WATER; HENCE, IT CONTAINS NO MEASURABLE VOC'S, WHICH CONTRIBUTE TO GREENHOUSE GAS EMISSIONS & LOWERS FLAMMABILITY RISK

- Capable of protecting timber from borers and termites
- Protects timber from rot and decay
- Outside above-ground applications
- Does not contain VOC's
- Comes with a 25 year guarantee from insect attacks and fungal decay

IDEAL FOR

- Appearance grade timber
- Exterior cladding
- Door frames & sills
- Engineered wood products
- Window componentry
- Decking

"Our mission is to provide innovative solutions, quality products and reliable service to our customers." Lew Fisher, Managing Director

✓ **FULL PENETRATION: Protected to the core**

Penetrates heartwood & sapwood from surface to core to include glue lines of engineered wood products and other wood types

✓ **PROTECTED: Against rot, borers, termites & mould**

Termite, decay and mould actives delivered deep into the core

✓ **CUSTOMISED TREATMENT: Including certification**

We can treat engineered wood products up to 17 metres long with certificates of Treatment provided for all timber treated. Full treatment records available for each pack, including litreage uptake.

✓ **DURABLE: For exterior use & safe for interior use**

Provides durability with globally accepted components that have excellent health, safety & environmental profiles

✓ **STRONG: Minimizes natural tendency to distort**

Low liquid uptake. Does not damage the wood structure

✓ **COMPLIANT: All treatment exceeds AS 1604**

All timber is treated to the requirements of AS1604.1:2012 and is tested for penetration and retention by a NATA accredited GLP laboratory

Why choose us?

Over 60 years' experience working with timber

Australian-owned family business, based in Gippsland
